DETAILED ACTION

Allowable Subject Matter

Claims 1 – 10, 12 – 21, 23 – 31, 33, and 34 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not disclose the use of segmenting an audio stream into frames, passing each frame through a filter, computing a modified spectral flux for "at least a subset" of frames, and identifying start and end frames based on the modified spectral flux being above or below a threshold. Specifically, it is noted that the modified spectral flux (as opposed to the an unmodified spectral flux) represents a spectral flux value that permits using a threshold. Above this threshold is used to determine a "stop frame" and below the threshold determines a "start frame." Furthermore, the Applicant has persuasively argued that one of ordinary skill in the art would not combine aspects of the prior art to obtain Applicant's invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The document to Zhang shows using spectral flux values on segments of an audio stream. Zhang does not show determining start and stop frames, by determining whether a modified (e.g., smoothed) spectral flux is above or below a given threshold. Similarly for Goodwin et al. (2006/0085188).
